Selec Controls Pvt Ltd.

We are a Company in the field of Industrial Measurements and Controls. We operate in the fields of Electrical Measurements/Controls, Monitoring/Time relays, Temperature/Process control, PLC/HMI products and Power electronics.

We are technology driven company; having complete Indigenous Development; and ever increasing capabilities in Electronic, Software and Mechanical Engineering. We manufacture around 2 million products a year, with highly automated processes, facility spread over One Lac sq. ft. in Navi Mumbai, Maharashtra. We have been on a very exciting phase of high growth, with increasing presence in India as well as in the international markets. At present, we have our sales subsidiaries in Germany and USA and Australia and exports to over 60 countries. In domestic market, we have strong 200+ distributor network with excellent sales & service support.

We are very well known for the supreme service that we offer to our customers. To cater to our growing needs, we are looking for some highly competent people, with the positive attitude and those are confident of taking charge of their own career, while continuously learning and commanding growth by their performance

Founded in the year 2000, we are now a strong team of around 650 with about 140 CR Turnover and ~17% CAGR over past 5 years. We have made substantial investments, to effect 250% growth in the next 3 years.

Our aim is to be a Global Engineering Powerhouse and a globally recognized brand in our field; and to design innovative products and processes to solve the needs of maximum number of customers, in the shortest time and best value. We also wish to be a major contributor in nation building, through the opportunity provided to engineers to pursue core engineering, which is a critical need in India at the moment.

Some more facts about our company:

- Large Research and Development facility with End to End design capability;
- Well-equipped laboratory, with EMC test facilities;
- Manufacturing facility for over 2.5 million products/year, including; Automated SMT assembly lines and test set ups, and a plastic injection molding plant.
- In-house Facility for Design, Manufacturing & Maintenance of mould tools;
- ISO 9001 certified since 2004;
- Our products comply with CE and UL certification standards.

We are happy to share that we have a flat organization structure, strongly supported by meritocracy that helps all bright employees to grow faster. Our seniors, who are domain/functional experts aptly play their role as facilitators and mentors and continuously work on upgrading Technology Capability.

We live the culture of Trust, Collaboration, Excellence and Freedom at work. Employees are encouraged to take charge of their work and career. We believe that one finds real joy in creating Excellence and we give all possible opportunities to learn through experience to our young engineers. Our principles and philosophy, is weaved unto our culture of openness and honesty, to resolve the challenges that we encounter in the course of our work.
